Institutional Distinctiveness

Vision: To foster an environment in which the spirit and the skill of creative individuals thrive, research and innovation flourish and the artistic need of the national and international community is served.

Mission: To establish strong links with the international art community for the benefit of students, by providing them with a platform to enhance their skills, through participation in national and international workshops and conferences, and give them a glimpse into the art industry and the opportunities to network with experts.

The College of Fine Arts (CFA), has established itself as a socially responsible and vibrant organisation. Being under the management of the Karnataka Chitrakala Parishath (CKP) provides the students and staff of the CFA an unparalleled opportunity to access, research and experience the vast storehouse of art-works, available within its thirteen museum galleries as also be benefitted by the expertise and knowledge of art-historians, and luminaries in the field of visual art, who frequent the CKP premises for various workshops, seminars, exhibitions and other formal and informal interactions.

In line with its vision, the CFA also organizes the "Chitra Santhe", a unique platform that promotes art and culture from all over the country, and gives a stage for local artisans, artists and visual art lovers from across the country to interact and learn from each other. The international links established by the CFA, over the years, has resulted in several exchange programs of research scholars, teaching faculty, artists and students, that has benefited the participants and enriched their perspectives and learning in the field of world art and culture.
